PART V	Vessels in Custody of National Defense Reserve Fleet	57

FOREWORD

The U.S. Vessel Inventory Report is issued semi-annually and contains information on all United States registered oceangoing merchant ships of 1,000 gross tons and over.

This report is in five parts:

Part I contains an alphabetical listing by vessel name of all merchant ships in the United States merchant fleet, whether privately owned or Maritime Administration-owned, showing each vessel's type, owner or operator, design type, and deadweight tonnage and year built.

Part II provides an alphabetical listing by owner or operator, together with their respective vessels, of all merchant ships in the United States fleet, whether privately owned or Maritime Administration-owned, showing each vessel's type, design type, and deadweight tonnage, and year built and also showing the total number of vessels for each owner/operator.

Part III lists Reserve Fleet Sites maintained by the Maritime Administration and merchant and military vessels in lay-up at each site, with the design type summaries for individual sites and for the Reserve Fleet as a whole.

Part IV lists military vessels currently in the National Defense Reserve Fleet by name, type, reserve fleet site, and design type.

Part V lists military and privately owned vessels currently in custody of the National Defense Reserve Fleet by name, type, reserve fleet site, and design type.

The following definitions and legend are provided for your information:

Design Type: For vessels not built to specific MarAd designs, the words "Private" and "Foreign Const" are shown in this column to indicate private construction and foreign construction, respectively. The letter "C" after the design type indicates "Converted" and the letter "J" indicates that the ship has been "Jumboized." For our purposes we have defined these as follows: Converted - Ships with major structural changes which have changed the general vessel type. Jumboized - Ships with major structural changes which have increased by carrying capacity without changing the general vessel type.

Legend

LU	Laid-up in the National Defense Reserve Fleet
ASPHALT	Asphalt Tanker
BULK CARR	Bulk Carrier
BULK/OIL	Bulk Oil
CHEM TKR	Chemical Tanker
COLLIER	Coal Carrier
COMBO P&C	Combination Passenger & Cargo
COMBO/REF	Combination Passenger & Cargo Refrigerated
CONTSHIP	Containership
CONT BARGE	Container Barge
CONT CAR	Container/Car Carrier
FREIGHTER	Freighter
L.N.G.	Liquefied Natural Gas Carrier
L.P.G.	Liquefied Petroleum Gas Carrier
NUC COMBO	Nuclear Combination Passenger & Cargo
OBO	Ore/Bulk/Oil
PART CONT	Partial Containership
REFRIG	Refrigerated
RO RO	Roll on/Roll off
SULPHUR	Sulphur Tanker
TANKER	Tanker
T/B - BLK	Integrated Tug/Barge - Bulk
T/B - TNK	Integrated Tug/Barge - Tank

INTRODUCTION

The total inventory of merchant vessels of 1,000 gross tons and over in the U.S. fleet decreased to 737 as of January 1, 1986. There were seven less vessels than the previous year's total of 744. This inventory of vessels totaling 24.3 million deadweight tons includes all merchant vessels in the United States-flag fleet, both privately and Government-owned.

The following table reflects the four major vessel types in the inventory, and shows how each type has fluctuated over recent years.

TYPE	1986	1985	1984	1982	1980	1975
FREIGHTERS	417	421	437	457	471	511
TANKERS	258	265	289	314	308	267
COMBO/PASS. & CARGO	37	35	38	63	65	60
BULK CARRIERS	25	23	24	19	20	19
TOTAL	737[1/]	744[1/]	788[1/]	853[1/]	864[1/]	857

The U.S.-flag fleet consists of 477 privately owned vessels of 21.2 million deadweight tons and 260 Government-owned vessels of 3.1 million deadweight tons. Of the 260 Government-owned vessels, 233 vessels are laid up at three national defense reserve fleet sites--Suisun Bay, California; Beaumont, Texas; and James River Reserve Fleet located at Lee Hall, Virginia. The remaining 27 vessels were being used by several Government agencies, State maritime academies, and private steamship companies under various forms of agreements with the Maritime Administration. The size of the Government-owned fleet has been declining over the past decade due primarily to the scrapping of over-age vessels built during World War II. As of December 31, 1975 there was an aggregate of 277 Government-owned vessels of 2.7 million deadweight tons. However, by the end of January 1, 1986 the fleet had decreased in size to 260 vessels with a total of 3.1 million deadweight tons.

The U.S. privately owned or operated fleet has also declined over the years. However, while the total fleet of 580 vessels at the end of December 1975, decreased to 477 by January 1, 1986, the deadweight tonnage increased from 15.0 million tons to 21.2 million tons over the same period. The following table reflects the breakdown of the privately owned fleet for the years indicated.

1/ - Includes Integrated Tug/Barge vessels.

TYPE	1986	1985	1984	1982	1980	1975
FREIGHTERS	209	216	233	252	263	305
TANKERS	235	247	274	296	288	250
COMBO/PASS. & CARGO	8	6	7	7	7	6
BULK CARRIERS	25	23	24	19	20	19
TOTAL	477[1/]	492[1/]	538[1/]	574[1/]	578[1/]	580

In absolute terms, freighters experienced the largest decrease during the years under review, but this decrease was countered by the construction of new intermodal vessels such as containerships, barge carriers, roll-on/roll-off (Ro/Ro) vessels, and the conversion of general cargo carriers to containerships and partial containerships. These intermodal vessels are generally large and capable of quick port turnarounds. Since 1975, the intermodal fleet has grown to 157 vessels. As of December 31, 1975 there were 107 containships, 23 barge carriers (LASH or Seebees), and only 9 Ro/Ro vessels in the fleet. However, by January 1, 1986, there were 99 containerships, 20 barge carriers and 38 Ro/Ro vessels. These three classes of ships are the most prominent in the intermodal fleet. Their growth is reflected below.

CLASS	1986	1985	1984	1982	1980	1975
CONTAINERSHIPS	99	99	95	101	113	107
BARGE CARRIERS	20	21	21	18	17	23
ROLL-ON/ROLL-OFF	38	29	27	23	23	9
TOTAL	157	149	143	142	153	139

The slight decrease in the number of containerships after 1981 was due to scrapping and/or trade-in to the Government of post war built vessels.

The U.S. bulk carrier fleet shows a slight increase over the past decade. As of December 31, 1975, there were 19 bulk carriers. However, by January 1 1986, the bulk carrier fleet had increased to 25 vessels. The bulk carriers fleet consisted of 2 ore/bulk/oil (OBO), 3 bulk oil, 1 collier, 5 integrated tug/barge vessels, and 14 bulk carriers.

Tankers, the other prominent type of vessels in the inventory, have decreased in number from 250 in 1975 to 235 as of January 1, 1986. The deadweight tonnage increased by 59 percent from 9.5 million tons to 15.1 million tons during the same period. The total tanker fleet of 235 vessels included 195 general purpose tankers, 1 liquefied petroleum gas tanker, 6 chemical tankers, 5 sulphur tankers, 13 liquefied natural gas tankers, and 15 Tank Integrated Tug/Barge vessels.

1/ - Includes Integrated Tug/Barge vessels.

FLEET CHANGES

The following vessels have been added to or deleted from the United States Flag Merchant Fleet since the last vessel inventory report.
